Professional Experience

Frontend Engineer

Li.Fi （ Feb, 2023 - present ）

- Developed Jumper.Exchange's compatibility with the SAFE environment, adding it in the trusted dapps list.
- Released an enhanced LiFi SDK, incorporating various improvements and bug fixes.
- Created a Progressive Web App for the website, improving SEO and page ranking, and implemented lazy loading of static files to reduce load times and bandwidth usage.

Senior Frontend Engineer

Zomentum （ Sept, 2020 - Jan, 2023 ）

- Significantly boosted revenue, achieving a 2x increase through the strategic refactoring of large-scale features.
- Led a team in migrating the frontend architecture to a monorepo, enhancing devs efficiency and collaboration
- Enhanced application performance by reducing redundant re-renders and refining the state hierarchy in Redux
- Introduced design system to resolve inconsistencies and facilitated component creation, coupled with a switch to Rollup, leading to faster build times
- Setup the Testing framework and enforced unit tests resulting in almost 1.5x reduction of bugs in development.

React Testing Library

Blockchain

thegraph, Ethers.js, Wagmi.sh, Solidity, Hardhat,

Projects

Purple Pay

A cross-border payments solution for B2B businesses where merchants can directly accept payments to their wallets via checkout page, Widgets or SDK.

- Engineered the frontend and smart contracts single-handedly, establishing the foundation of the project
- Led a frontend development team, facilitating rapid feature deployment and creating SDKs and widgets compatible with no-code platforms

NoCodeLetters

A seamless solution to send and manage email newsletters from a Notion workspace, eliminating the need for external Email Service Providers

- Led the complete development and design of the product, driving user engagement and securing over 1000 users, culminating in a micro-acquisition for $10k
- Integrated with AWS's SES and SQS to ensure optimal email delivery, managing 400-500 emails daily, with a tech stack comprising ReactJs/NextJs, TailwindCSS, FirebaseDB, AWS SES and SNS, TypeScript, and Vercel.
